IT managers just love open source

Submitted by [srlinuxx](#) on Tue, 05/10/2005 - 17:45. [oss](#)

The use of open source software, including Linux and applications, in local authorities has a bright future, according to a survey by the Society of IT Managers.

Linux vs. Windows on 64-Bit Chips

Submitted by [srlinuxx](#) on Tue, 05/10/2005 - 10:56. [Linux](#) | [MS](#)

For the first time in history, there are more Linux software choices than Windows choices -- in the 64-bit arena -- but it is likely that the situation will not remain that way for long. Let the debate begin anew, in other words.

Windows 2003 Really Does Outperform Linux!

Submitted by [srlinuxx](#) on Tue, 05/10/2005 - 10:17. [Humor](#)

For years, the Blartner Group and various other prestigious research firms have issued benchmarks claiming that Linux is inferior to Windows. Naturally, we at Humorix have always been skeptical. But while scraping the bottom of the barrel for story ideas last week, we decided to see if we could duplicate any of these benchmarks on our own.

Has Windows 7 killed Linux on the desktop?
 Submitted by srlinuxx on Sun, 06/20/2010 - 07:06 [Linux](#)
 techradar.com: People don't just like Windows 7, it's the anti-Vista: loved for as many often spurious reasons as Vista was hated. But has Window 7 seen off any threat from open source operating systems? In other words, has Windows 7 killed Linux on the desktop?

Traditional Server Guy's Views on the Linux Desktop
 Submitted by srlinuxx on Sun, 06/20/2010 - 07:04 [Linux](#)
 pclinuxos2007.blogspot: While Linux is growing leaps and bounds, it's time we spread the same in the mass psyche, public mind share. So, where do we start? Noobs? New converts? Non-profit, governmental organizations? Or from the top, the busy Enterprise Linux server room managed by a traditional server guy? To me the latest seems a good starting point. Here is a few of his theories.

ZevenOS 3.0 Review: Refreshingly different!

Submitted by srlinuxx on Tue, 04/02/2013 - 02:43 [Linux](#)

mylinuxexplore.blogspot: Last week I came across the release note of Neptune in Distrowatch based on Debian Wheezy and I was quite intrigued to try it out. And I must say, it was really worth it. What a wonderful distro the ZevenOS developers have created!

Open source still has a few gaps to fill to go mainstream

Submitted by srlinuxx on Tue, 04/02/2013 - 02:41 [Linux](#) [oss](#)

techrepublic.com: Linux has come a long, long way. But it still has a few gaps to fill before it will be considered by small to medium-sized businesses. Jack Wallen offers his take on those gaps.

AMD RADEON R9 290 ON LINUX

Submitted by Rianne Schestowitz on Tue, 11/19/2013 - 17:11 Linux

AMD unveiled the Radeon R9 290 graphics card at the beginning of November as one step down from the new flagship Radeon R9 290X graphics card. Numerous Windows reviews praised the graphics card for its great performance, but what wasn't clear at the time was how the Linux performance and compatibility was for this new \$399 USD graphics card. AMD hadn't offered any review samples to Phoronix for conducting any Linux-based testing and benchmarking, but it's more clear now why that didn't happen: the Linux performance isn't stellar. I bought an XFX Radeon R9 290 and now there's many Linux benchmarks coming out of this graphics card that's riddled by what might be driver issues. I already regret having purchased the AMD Radeon R9 290 for use on Linux; the graphics card is hot, power hungry, noisy, and the OpenGL results aren't too good.

QT 5.3.1 RELEASED

Submitted by Rianne Schestowitz on Wednesday 25th of June 2014 09:44:28 PM Filed under [Development](#) [KDE](#)

I am happy to announce that today we released Qt 5.3.1. Qt 5.3.0 has been well received with over 500.000 downloads in the first 5 weeks of release. I believe this new patch release is even better offering many improvements over Qt 5.3.0. As a patch release, it does not add new features, but various improvements and fixes. Qt Creator version 3.1.2 also released today, is packaged into the installers. For Qt Enterprise users we are providing a fully supported Qt Quick Compiler 1.0.0, as well as updates for Data Visualization (version 1.1) and Charts (version 1.4).
