Beautifying Debian Etch

By *jozmak*

Submitted by jozmak on Thursday 5th of April 2007 10:51:30 PM Filed under [Howtos](#) [1]

Debian is one of my favorite distros; but in terms of look, I hate it. At each release, I am hoping for visual improvements but each time I get disappointed. Etch is no different, the artworks are unpolished, the icon set (Rodent on the Xfce desktop) is prehistoric and in general, the desktop has a poor aesthetic appearance. These issues prompted me to redesign the entire desktop and create a visual environment that is pleasant to work with.
