From GoblinX rss:

"We published a screenshot tour of the Xfce 4.5.90 (first alpha release for the Xfce 4.6). The tour is a good preview of the next Xfce. You will find twenty nine pictures (480x360) of the Xfce running on GoblinX current and also a tarball with 1280x1024 pictures to download. Visit the tour right now."

I'm using it without much problem so far. Only found a bug in the Xfce panel when I tried to close the bottom panel it crashed.

The tour is here: http://www.goblinx.com.br/xfce_ss/xfce_4.5.90.screenshots.htm [2]
