Learn your command line, kids! Nine years ago, I was such a nOOB that I was drummed out of a couple of Linux chats, and I couldn't even install Slackware... and now I have my own live CD, and it's been downloaded hundreds of times all over the world. It's an awesome hobby.

Of course, most of the credit goes to Patrick Slackware and Tomas Slax. But KIARA (Kiara Is A Recursive Acronym) is the best way I know to experience KDE3 without needing any harddrive "skin" in the game. In other words, it's the only KDE3 live CD I know that keeps the web browsers current. In my experience, Nothing brings New Life to an old Desktop like New Web software.

Complete List of added Software packages.
