Yet another screen shot post on yet another pre-stable release distribution. This time, it is from Kubuntu 12.04 beta 1, the first beta release of what will become Kubuntu 12.04 LTS (Long Term Support).

Unlike Fedora 17 alpha, which is loaded with new and enhanced features, some of which have been written about here and here, Kubuntu 12.04 beta 1 comes with very few new features, other than the usual upgrades to software and the kernel.
