- [Josh Bressers: Episode 329 ? Signing \(What is it good for\)](#) [3]

Josh and Kurt talk about what the actual purpose of signing artifacts is. This is one of those spaces where the chain of custody for signing content is a lot more complicated than it sometimes seems to be. Is delivering software over https just as good as using a detached signature? How did we end up here, what do we think the future looks like? This episode will have something for everyone to complain about!

- [GNU World Order 466](#) [4]

`**kde-dev-scripts**` , `**kde-dev-utils**` , `**kde-gtk-config**` , `**kdebugsettings**` , `**kdeclarative**` , and `**kdeconnect**`. from Slackware set `**kde**`.

- [How to install Microsoft Edge on Pop! OS 22.04 - Invidious](#) [5] [Ed: Edge is malware and a password stealer; don't even use it]

-

[Source Vs Binary Package Managers: What's The Best? - Invidious](#) [6]

Most Linux distros at this point use a binary based package management solution but source based solutions still do exist, the question is which is better and why have source based distros all but disappeared.
