Tutorial to install Ubuntu 9.10 to a pen drive and persistently make changes to the files.ubuntu_pendrive_install
ubuntu_pendrive_install

Here is a trick which enables you to install ubuntu 9.10 on a pen drive.

Just follow the steps:

- 1.fire your pc with the ubuntu live cd .
- 2.When the system comes to its functional state from the system menu select administration and then USB startup disk creator.
- 3.Make sure your pc boot option is set to USB boot in the bios of your system.
- 4.Restart your pc and it will run ubuntu 9.10 from your thumb drive.

Note: 2GB USB drive is enough for the installation of ubuntu on the pen drive.For a regular install 8 GB drive is necessary as 4 GB leaves only a little space.The following steps illustrate a persistent install on USB drive.

- 1.Download the linux .iso file which is the ubuntu 9.10 .iso image
